

- For an electric frying pan we hired Wolfgang Puck to pose in a kitchen with the product
- For a new portable car GPS system we photographed the inside of the car with the system hooked up with the scene of an open road driving through mountains
- For a laptop computer we grouped them, all different colors, on a solid background, each one of them with a different nature scene on its background
- For a golf cart we photographed it on the green of the Keowee Vineyards Course
- For an improved solar panel we photographed it alone in front of a blue sky with clouds and the sunlight radiating off of it
- For a new MP3 player we fanned them out and photographed them on a solid white background then enhanced them with shadowing, creating a 3-D kind of look

I hope you take the time to look over some of our work and that you find that Leberfingerr Innovations is the right agency for you.

Sincerely,
Ali Leberfingerr
